Portable cord and plug connected equipment and flexible cord sets (extensions cords) shall be visually inspected before use for external defects (such as loose parts, deformed and missing pins, or damage to outer jacket or insulation) and for evidence or possible internal damage (such as pinched or crushed outer jacket).
2. Replace damaged or frayed electrical cords immediately.
3. All electrical cords should have sufficient insulation to prevent direct contact with wires.
4. Flexible cords must be grounded and protected from accidental damage.
 - a. Do not alter cords; do not remove ground pin
 - b. Adapters which interrupt the continuity of grounding may not be used. 3-2 Adapters are prohibited.
